Davao City, Philippines

Aspiring Security Analyst with foundational experience in penetration testing, ethical hacking, and security assessment using Kali Linux. Skilled in mock attack simulations, vulnerability identification, and basic cybersecurity practices. Equipped with additional experience in full-stack web development and database management, providing a solid understanding of application and network security. Highly motivated to contribute to security operations and further develop expertise in protecting systems from emerging threats.

## Hard Skills

- Penetration testing
- Vulnerability testing
- Kali Linux
- Threat analysis
- Network security
- SQL and Database security
- Scripting and automation basics
- Machine Learning using Python
- UX/UI design

## Soft Skills

- Strong analytical thinking
- Attention to detail
- Effective leadership
- Ability to work independently and collaboratively
- Adaptability and continuous learning
- Clear technical communication
- Report writing
- Presentation and documentation skills

## Projects

<b>Title</b>	<b>TeacherTalkPH Website</b>	<b>Crime Rate Analysis and Hotspot Prediction in the Philippines</b>
<b>Skills used</b>	UX/UI design with Database integration	Data Analytics, Data Mining, with Machine Learning integration
<b>Description</b>	A simple website for a startup company. Used UX/UI design as well as the integration of a database for client forms.	A simple web application that predicts crime hotspots around the Philippines using historical data for the algorithm.

## Education Background

Bachelor's Degree in Computer Science

Mapua Malayan Colleges Mindanao (Davao City)

2023-2027

## Certifications

Certification name	Issuing organization	Year earned
Certified Ethical Hacker (CEH) v.12	Packt through Coursera	September 2025
Certified Information Systems Security Professional (CISSP)	InfoSec through Coursera	September 2025
Google Cybersecurity	Google through Coursera	September 2025
ITS Certification in Data Analytics	Certiport	October 2025
ITS Certification in Java	Certiport	October 2025

## Technical Proficiencies

### Programming Languages

- Python
- Java
- HTML, CSS, JavaScript
- SQL
- C#

### Tools/Software

- Visual Studio and Microsoft Visual Studio
- Kali Linux
